-After evaluation and diagnostics of P1, it was found that the cable connector and capacitor have failed, and replacement is needed.

-The motor Tests within the caution range; replacement is **strongly recommended** at this time (this item is a kit and will include housing and mounting components that were noted as damaged or incorrect)

-When replacing cable, it is possible the conduit can not be reused due to the old cable being stuck in it. If the conduit needs to be replaced, additional costs will be added for the conduit and labor hours required for trenching

-The above labor hours are an estimate; any additional time will be billed at the \$125 per hour rate
